FECS Millennium Project

Celebration of 100 Distinguished European Chemists from the Chemical Revolution to the 21st Century

The Federation of European Chemical Societies entered, as a Millennium Project, the celebration of Distinguished European Chemists spanning a period of over two hundred years.

Member societies and individuals were invited to submit their nominations of distinguished European chemists from the end of the 18th century until the present day. In addition to Nobel Prize winners, there were nominations of many others from Europe who have, over more than two centuries, transformed the science and influenced science, industry or society worldwide. The final list includes a diversity of nationalities. As well as being published in the magazines of the national chemical societies the list is available for viewing here along with a brief biography and details of their achievements.

Com o Millenium Project, a Federação das Sociedades Europeias de Química pretende homenagear os 100 químicos que, em sua opinião, mais se distinguiram desde o final do século dezoito até aos dias de hoje. Cada Sociedade nacional pôde nomear químicos europeus e a lista que aqui se apresenta é o resultado da escolha entre essas nomeações. Inclui, para além dos laureados com o

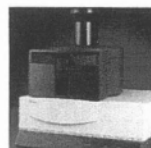

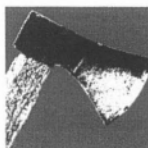

prémio Nobel, químicos de diversas nacionalidades e especialidades. Os homenageados são ordenados por século e para cada um é apresentada uma breve nota biográfica com fotografia, juntamente com endereços de sites onde é possível encontrar informação complementar.
